

AUGUSTA UNIVERSITY
LABORATORY SAFETY TRAINING CHECKLIST

Under Georgia Law and AU policies, supervisors are responsible for providing documented Right-To-Know (RTK) safety training for all employees and compliance with all pertinent safety regulations applicable to their work functions. Training can be formal or informal, individual or group-based. This form, which is required only one time, for each lab the lab worker is assigned, will be used to document specific items to be completed by the employee and his/her supervisor to successfully complete the Initial Chemical Lab Safety Training and the Initial Biosafety and Bloodborne Pathogen Safety Training. Employees will receive credit for this training after this form has been completed (**both pages**), signed and returned to EH&S. Questions should be directed to Augusta University's EH&S (706-721-2663).

IMPORTANT: General safety issues are covered and documented during the Initial Chemical Lab Safety training and the Initial Biosafety and Bloodborne Pathogen Safety Training. It is the responsibility of the supervisor to verify attendance at this training and to complete all items of laboratory specific training and location of safety items listed below prior to the start of work.

Required Training	Date of Completion	Location of Safety Items	Date of Verification
Right-to-Know Basic Awareness with Global Harmonized System(NEW) http://www.usg.edu/facilities/rtk-ghs		Safety Shower	
Hazardous Waste Awareness RTK http://www.usg.edu/facilities/training/hazwaste/		Eyewash Station	
EPA Training for AU Laboratory Staff http://educatorstoolbox.gru.edu/Video/200_8/mcstrategies/epa/index.html		Fire Extinguisher	
Initial Biosafety and Bloodborne Pathogen Training. To self-assign the training, open the https://train.augusta.edu . Enter your Jag ID and Password and click Register for Training on the right hand side. Choose the Initial Biosafety and Bloodborne Pathogen Training and click Reigster. If you have any questions or do not have a Jag ID, contact the Biosafety Office, 706-721-2663 or Biosafety@augusta.edu		First Aid Kit	
		Chemical Spill Kit	
		Gas Shutoff valve	
		Electrical Panel box	
		Critical Event and Emergency Response Flipchart	
Code Red Poster		I am familiar with the location(s) of all safety equipment in my work area and their operation and have demonstrated to my supervisor this knowledge.	Y / N

Circle 1

I am aware of the Personal Protective Equipment (PPE) requirements for the hazards within my work area (to include full length long-sleeve ab coat, safety eyewear, closed toed shoes, long pants/skirt, and appropriate gloves) and can access these items. Y / N

I am current on my training per Augusta University Policies and Procedures (P&P) 4.2.01, Hazardous Chemical Protection & RTK Plan.

Y / N

I have read and understand Augusta University's P&P 4.2.01. Hazardous Chemical Protection & RTK Plan.

Y / N

I have reviewed and understand the lab's Institutional Biosafety Committee (IBC) approved Biosafety Protocol(s) (BSPs) and Standard Operating Procedures (SOPs), and these documents are available to me.

Y / N

I am familiar with the Emergency accident/injury/exposure procedures, and the emergency telephone numbers for DOAS and EH&S are readily available to me with detailed instructions on the Critical Event and Emergency Response Guide.

Y / N

I have been advised of the potential hazards in the lab and any increased risks of infection which may exist in the lab. Prophylactic medical measures (e.g. vaccinations) have been discussed with me.

Y / N
